Yesterday what might have proven a fatal accident, was prevented by the presence of mind of William Lee, propmy man at the Grand Opera House. A team hitched to a light rig was fastensil to a post in the rear of some buildings on Twenty-fourth street, a piece of paper was flying around and scared the animals who broke loose and dashed away with a little 5-year-old by in the vehicle. Billy soon took in the perlious situation of the little boy and quickly sprang to the wagon and grabbed the little boy in his arms and they both tumbled out onto the ground. The little fellow escaped uninjured, but Buly got several bruises in his fall.

Fortunate Escape-Budget of Interesting News Briefs.

Special Correspondence.

Monroe, Sevier Co., May 7.—The topic for the past week has been, as with other parts of Utah, of the great Sco-field disaster, and doubt as to the safety of some of our citizens was for

a time apprehended.

Jas. S. Munson, a miner, was happily not on that shift, otherwise he no doubt not on that shift, otherwise he no doubt would be numbered with the slent dead. He came home two days ago accompanying some of Sevier county's dead. His report of the awful scene is in harmony with that of others, only more vivid, as he was one of the brave rescuing party, and could give details from personal encounter. The town council has not met since the Gover-

Cannot be Cut Out or GANGER Removed with Plasters

Surgical operations and flesh destroying plasters are useless, painful and dangerous, and besides, never cure Cancer.

No matter how often a cancerous sore is removed, another comes at or near the same point, and always in a worse form

Does not this prove conclusively that Cancer is a blood disease, and that it is folly to attempt to cure this deep-scated, dangerous blood trouble by cutting or burning out the sore, which, after all, is only an outward sign of the disease -a place of exit for

Cancer runs in families through many generations, and those whose ancestors have been afflicted with it are liable at any time to be stricken with the deadly malady.

Only Blood Diseases can be Transmitted from One Generation to Another

-further proof that Cancer is a disease of the blood. To cure a blood disease like this you must cure the entire blood system—remove every trace of the poison. Nothing cures Cancer effectually and permanently but S. S. S.

S. S. S. enters the circulation, searches out and removes all taint, and stops the formation of cancerous cells. No mere tonic or ordinary blood medicine can do this. S. S. S. goes down to the very roots of the disease, and forces out the deadly poison, allowing the sore to heal naturally and permanently. S. S. S. at the same time purifies the blood and builds up the general health.

A little pimple, a harmless looking wart or mole, a lump in the breast, a cut or bruise that refuses to heal under ordinary treatment, should all be looked upon with suspicion, as this is often the beginning of

a bad form of cancer. Mrs. Sarah M. Keesling, 911 Windsor Ave., Bristol, Tenn., writes: "I am 41 years old, and for three years had suffered with a severe form of Cancer on my jaw, which the doctors in this city said was incurable, and that I could not live more than six months. I accepted their statement as true, and had given up all lope of ever being well again, when my druggist, knowing of my condition, recommended S. S. S. After taking a few bottles the sore began to heal, much to the surprise on the physicians, and in a short time made a complete cure. I have gained in flesh, my appetite is spleudid, sleep is refreshing—in fact, am enjoying perfect health.

CANALS AND DITCHES. Tree planting for an unusual purpose

has been recommended to residents of the wstern irrigation district by W. L. Hall, assistant superintendent of tree planting of the division of forestry, who has recently been in New Mexico on an investigation. Agriculture in that region depends largely on irrigation, and the streams and reservoirs are much depleted by evaporation due to the heat and dry winds. Mr. Hall recommends that belts of trees be planted along every ditch and reservoir, not only to shade them, but to shelter them from wind. The problem of preventing evaporation is very important, not only on account of the loss of water, but be-cause the percentage of alkall in the quantity remaining becomes excessive. -Forestry Bulletin.

THE POWER OF SENTIMENT.

Forced Action in the House on the Nicaragua Canal - Free Home Bill to Be l'assed.

Special Correspondence.

Washington, May 2.-Close votes in the Senate seem to be a regular thing of late. It was only a little more than a year ago that the Paris peace treaty was ratified by one vote. By one vote Quay was denied a seat in the senate. There was a time when it was estimated that only one or two votes either way would have changed the result on the Porto Rican bill in the senate, although the final vote showed quite a wide margin. These close votes always make an interesting situation. That in the Quay case was especially so. It was not until the name of Mr. Vest was finally called and he had voted against his lifelong friend that the contest was really determined. Even then if Petti-grew, who had been a warm personal friend of Quay for 12 years, had cast his vote in favor of the Pennsylvanian there would have been a tie and the Quay case remained unsettled. now generally believed in the senate that the result in the Quay case will settle all cases hereafter. Quay was sent senators appointed by governors after legislatures failed to elect. His popularity in the senate is unquestioned, and a vote on personal popularity alone would have seated him. Many votes were cast for him by men who did not believe in-the constitutionality of seating senators under such circumstances.

POWER OF PUBLIC SENTIMENT. The determination to give consideraion to the Nicaragua canal bill shows the power of public sentiment in this country when it is once aroused. It has been evident that the more con-servative element, and especially the managers of the Republican party, thought it advisable not to have any canal legislation until the Walker commission, which is now making a thorough investigation of all the canal routes, shall present its report. It is possible that this element in the senate will now prevent the consideration of the bill which the house will send over. But the house managers were compelled to listen to the demand of the 200 representatives who were no further delay in Nicaragua cana legislation. The desire for the build ing of the great waterway seems to have spread over the country to such an extent that Congress must act soonan extent that Congress must act soon-er or later. The proposition is that the Senate will become conservative and hold the canal bill over until the next session, by which time the Walk-er commission shall have reported, and, if necessary, the bill can be amended

in accordance with the report.

FREE HOMES BILL. There is joy in the hearts of a number of western representatives, espe-cially those who come from States where there have been large tracts of lands purchased from the Indians. This is because an agreement has beer made to consider the free homes bil early in May. There is no doubt about It passing, as the sole business almost of the men from the western States during the entire session of Congress has been to get pledges for the sup-port of this bill. It means much to these men in the way of indersement at home, but it means much more to those thousands and thousands of set-tlers on the lands which were purchas-ed from the Indians. It will allow lands under the homestead laws, the same as other lands have been acquir-ed, without the payment of the price ed, without the payment of the price which was given to the Indians. As this price averaged anywhere from \$1.50 to \$3.75 an acrs, according to the value the Indians placed upon the lands when sold, it will relieve the settlers from a considerable burden. The government is giving up a considerable sum, but the policy of granting free homes on the public domain is carried out. The men most pleased with this arrangement are Representawith this arrangement are Representa-tives Gamble and Burke, of South Da-kota, Eddy, of Minnesota, and Delegate Flynn, of Oklahoma,

MANY TOURISTS.

Washington is just now and has been for several weeks past filled with tourists from many sections of the country, It is, of course, a very pleasant time to visit the capital city, just as spring is coming, when the trees are turning green and many parks are showing up splendld form and the magnoli trees and other early southern plants are in bloom. Many of these excursionists come in squads and usually belong to the "personally conducted tours" of the Pennsylvania railroad, which makes a specialty of taking peo-ple from all sections of the country through which their lines extend and giving them an opportunity to see at very reasonable rates the capital city and surroundings. These companies of tourists are usually in charge of of tourists are usually in charge of some man who is well acquainted with Washington and the surrounding points of interest, which include Old
